**DETAILED ACTION**

***Election/Restrictions***

***Combination/subcombination***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1- 17, drawn to monitor multiple diagnostic components, classified in class 702, subclass 183.
  - II. Claims 18-23, drawn to use linear eigenvectors equations analyze multiple components, classified in class 702, subclass 194.

The inventions are distinct, each from the other because of the following reasons:

Invention I and II are related as combination (invention I) and subcombination (invention II). Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particular of the subcombinations as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Invention II, the combination as claimed does not required to use linear eigenvectors equations analyze multiple components. The subcombination (invention II) has separate utility such as a using linear eigenvectors equations analyze multiple components.

Art Unit: 2863

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

During a telephone conversation with Dale C. Barr on 3/18/05 no election was made. Affirmation of this election must be made by applicant in replying to this Office action. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143)

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
